

Millwright Services

Like the welding of special alloys or the fabrication of pressure vessels, the installation of complex, expensive equipment is best left to the experts. The Piping & Equipment Millwrights are ready to ensure the job is done right.

Specializing in

- Precision shaft alignment
- Equipment moving
- Equipment assembly and leveling
- Conveyor installation
- Conveyor maintenance
- Precision grouting
- Pump alignment
- Certified Welding

On Site At

- Power plants
- Manufacturing facilities
- Pipeline terminals
- Pipeline stations
- Chemical plants
- Refineries
- Processing plants
- Recycling facilities

For decades, we have provided quality alignment and grouting services. We can provide installation and maintenance for pumps, compressors and conveyor systems. We are ready to assist your current in-house maintenance staff during peak times or even supply a complete maintenance staff.

When work needs to be done safely, economically and quickly, Piping & Equipment has the staff of specialists to get the job done!
